

14-: high-density polyethylene/nylon industrial spray bottle, 16 oz

Cole-Parmer Cat No. EW-06092-00

Features:

- Constructed of tough chemical-resistant materials, this new trigger spray bottle reduces sidewall collapse and outlasts most general-purpose spray bottles.
- The bottle features a high-density polyethylene (HDPE) outer layer with a nylon inner layer—suitable for hydrocarbon products such as fungicides, fuel additives, brake fluid, and tire cleaners.
- The sprayer is made of non-corrosive polyester with stainless steel balls and springs—ideal for chemicals that are normally incompatible with polypropylene, such as ethers and ketones.
- Adjustable nozzle permits a versatile spray pattern from a fine mist to a jet stream. Strainer at the base of the spray tube filters out impurities.

Specifications:

Capacity (mL)	473
Capacity (oz)	16
Material	HDPE
Description	high-density polyethylene/nylon industrial spray bottle, 16 oz
Origin	U.S.A
Price	5 \$ /each
WEEE Categorization	OUTSIDE WEEE - PLC/SBC SET
